# Sterlite Decor

Sterlite Decor is a brand by Sterlite Metal & Tubes, a dealer of Stainless Steel and Mild Steel since 1990. Sterlite Decor aims to become one stop solution for the customer regarding any kind of Metal Fabrication of Furniture, Metal Cladding, Railing, Profiles etc.

Our main clientele are Interior Designers, Architects, Corporate Complexes, Residential Buildings, Malls, Multiplexes and likewise. The major application of our products - profiles and sheets are for Wall Panel, Ceiling, Tiles, Flooring, Main Door, Interior Decoration, TV Units, Bathrooms, Signages, Lobbies etc.

## PVD

PVD stands for Physical Vapor Deposition thin-film coating is a process in which a solid material, often a metal, is vaporized in a vacuum and deposited, atom-by-atom, onto the surface of a part. The PVD process forms a thin, bonded, metal or metal-ceramic layer on the surface that greatly improves the appearance, durability, and/or function of a part or product. The deposition process can be easily customized to change the color, durability, or other characteristics of a coating.

## The advantages of PVD coating

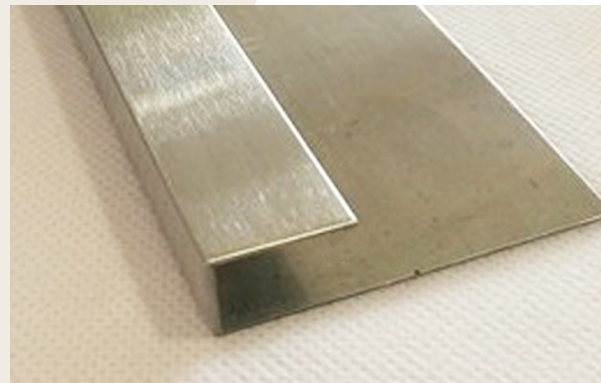

PVD coating is a good option for applications that require an extremely thin functional coating. PVD coating processes deposit a layer of high density material that's only a few microns thick. Once applied, the coating is nearly impossible to remove, and won't wear off on its own. Additional benefits include:

- Durability
- Long term cost savings
- A vast array of colors
- Waste reduction
- Uniform and conformal coating
- Corrosion resistant and chemically stable
- Not affected by most acids and alkalis
- Lower maintenance cost
- Increased quality of the product
- More environmentally friendly than traditional coating processes such as electroplating and painting

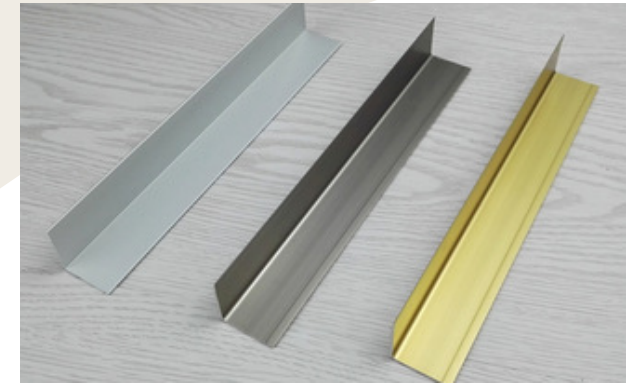

### TI PVD COATED "C" PROFILE

Grade : SS 304 | SS 316 | SS 202  
 Thickness: 0.5 mm to 3 mm  
 Finishes: Mirror | Hairline | Bead Blast & Many more
